

# Quick Reference: The 9 Metrics and What Enables Them

Security Metric	Technical Capability Required	Relevant Frameworks
Endpoint Detection Coverage	Agentless network monitoring, real-time device discovery	NIST CSF ID.AM-1, CIS Control 1, CISA CPG
Patch Compliance Rate	Software version visibility across all discovered devices	NIST 800-53 SI-2, HIPAA Technical Safeguards
Critical Vulnerabilities Open Past SLA	Vulnerability correlation and prioritization	NIST CSF RS.MI, CISA CPG, Cyber Insurance Requirements
Vulnerability Remediation Time	Timeline tracking from discovery to resolution	NIST 800-53 RA-5, PCI-DSS 6.3
Incident Volume	Behavioral analysis and SIEM correlation	NIST CSF DE.CM, HIPAA Security Rule
MFA Coverage	Authentication traffic monitoring	NIST 800-53 IA-2, HIPAA Access Controls, CISA CPG
Privileged Accounts Reviewed	Privileged access pattern monitoring	NIST 800-53 AC-2, PCI-DSS 7, HIPAA
Phishing Click Rate / Credential	Credential pattern detection, authentication anomaly monitoring	NIST 800-53 AT-2, CISA CPG
Compromise General Workforce Preparedness	Network behavior insights, training platform integration	NIST 800-53 AT-3, HIPAA Training Requirements
